

# Playing the Bitsboard Games

Bitsboard offers a set of items and then multiple ways in which you can engage and play with the items.

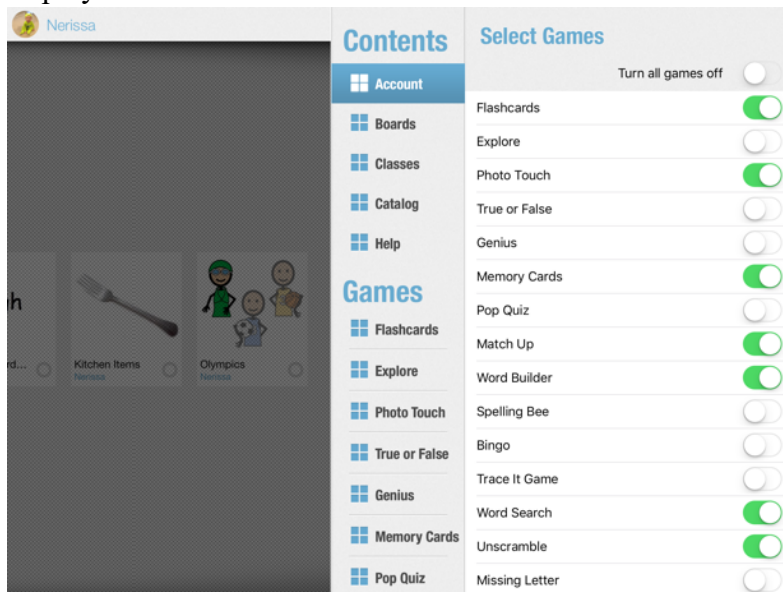

- From your main page select the board you wish to play.
- Then choose the way you want to play it (i.e., Photo Touch, Flashcards, Memory Cards, etc.). The app will automatically present the Bitsboard in that game format. Please note that some games will work better than others depending how the bits have been programmed.

## Adjusting Which Games Are Available

As noted, some games work better depending on how the Bitsboard was created. You can adjust which boards are available by following these steps:

- Go to “Settings.”
- Then under “Account” you can choose to “Select Games.” Toggle which games you do and don’t want displayed.

- Once you go back to play the Bitsboard only those games toggled “on” will be available to play.
