Auditory working memory is the "ability to take in information that is presented orally, process it, retain it in one's mind, and then recall it." (Bellis, 2003; Roeser & Downs, 2004; Stredler-Brown & Johnson, 2004)

Packet Contents:

1. Number Memory: repetition, chunking, visualization, grouping, and singing
2. Word Memory: repetition, singing, visualization, and sentence generation
3. Auditory closure: phrase and sentence level (predict and repeat)
4. Sentence repetition and WH questions: visualize, repeat, and details

General directions: Use the auditory memory strategies provided for each game. Choose from the universal game boards at the end of the packet to play an individual deck, if desired.

Specific Activity Directions:

1. Number Memory: practice each strategy in isolation using the universal game boards at the end of the download, then shuffle each card deck (repetition, chunking, visualization, grouping, and singing) and place them on the DRAW pile board. Play the board game, completing a card that matches each space when you land on it.
2. Word Memory: complete the same as Number Memory, practicing each skill in isolation first (repetition, singing, visualization, and sentence generation).
3. Auditory closure: shuffle the decks together (phrase and sentence level) and sort onto matching seed packs on flower pot board as completed, or use a universal game board.
4. Sentence repetition and WH questions: Have the student repeat each sentence in isolation (using a universal game board) then play the WH game with strategies (visualize, repeat, and details), stating the detail of the sentence that matches each space you land on.

For each game board, use any dice or spinner that you have on hand.

Auditory Memory Strategies for Numbers

1. Repeating: say the numbers over and over to help you remember them, such as:

3, 4, 6 ; 3, 4, 6; 3, 4, 6

2. Grouping: think of the numbers in groups such as:

5, 3, 7, 1, 8, 9 =
1,3,5 7,8,9

3. Chunking: put the numbers together in chunks such as:

6, 3, 7, 1 = 63, 71

4. Visualize: picture the numbers in your mind as you hear them.

5. Singing: put the numbers to song or a rhythm such as:

5-7-9, 3-8-1
