Game assembly and play:

1. Cut out and laminate all cards, game visual, and definition template.
2. Shuffle cards and deal seven cards to each player.
3. Place remaining cards in a pile face down and flip one card face up.
4. First player must place a card on the pile with a symbol that beats the current face up card. Rock beats scissors, scissors beat paper, paper beats rock. The player must say the definition of the word on the card he is playing. Use the definitions template board to help the student formulate a definition for the word depending on the part of speech (noun, verb, adjective).
5. If the current player does not have a card with a symbol that beats the face up card, that player must draw one card from the pile (as in Uno). If he draws a card he can play, he should play it. If he cannot play the card, it is the next player's turn.
6. The first player to play all of his cards is the winner!

Rock beats scissors

Scissors beat paper

Paper beats rock

Template for Definitions of Words

A (noun word) is a kind of (category) that (describe with attributes).

(Verb word) means to (describe action).
